Areas of Industry we can Introduce:

Metal/resin/ceramic/rubber parts, and electronic parts, manufacturing equipment, inspection equipment, etc.

EXAMPLE

Piezo Sonic Corporation

Overseas Company A

About Piezo Sonic

Piezo Sonic Corporation can design, develop, manufacture and market ultrasonic motors.

Capable of holding maximum torque with zero standby power, making it ideal for robots and positioning equipment.

No electromagnetic force is used for rotation, so it can be used in magnetic field environments such as magnetic resonance and semiconductor manufacturing equipment.

How we support

Ota city and Piezo Sonic jointly exhibited at an overseas exhibition.

We contacted company "A" participating in the same exhibition and propose Piezo Sonic's products.

After the event, Piezo Sonic received an inquiry and deliver the quotation and samples to company "A".

Ota city supported both party such as contract, documentation and international trade process etc.
